Preventative Maintenance Programs

Preventative Maintenance Programs save money, time, and hassle. Let us take care of your crane maintenance.

- Choose the PMP that fits your needs; Monthly, Quarterly, or Annually
- We'll automatically call you when your cranes are due for inspection

By choosing a Preventative Maintenance Program you:

- Avoid costly down time
- Catch small repairs before they become big problems
- Extend the life of the crane
- Reduce the number of service calls
- Comply with MiOSHA requirements on inspections and are aware if the crane is in violation

Overhead Crane & Hoist Inspections

- A complete computer generated inspection report highlighting all major components of the unit (bridge, trolley, main & auxiliary hoist, cab, wire rope & hook).
- OSHA (MiOSHA) regulations, CMAA recommendations, ASME standards and NEC requirements along with violation number and our suggestion regarding compliance.
- Notification of areas of wear, stress or fatigue.
- Recommendations and suggestions on needed repairs and other maintenance issues.
- Lubrication of required components.
- Inspection of all bolted and welded connections.
- Minor adjustments.
- Hooks checked for cracks.
- Cables checked for broken wires.
- Table 3 of MiOSHA Part 18 covered in it's entirety (this is the MiOSHA mandatory inspection checklist).
- Operational test run through of all functions of the unit.
- If applicable, a severe damage report indicating areas that need immediate attention will be provided to you at the time of the inspection.

Cady Lifters

Power below the crane...

Below the hook lifters for cranes & hoists

CM Cady Lifting Beams are ideal for a multitude of applications from low headroom and high capacity to load leveling and multiple-point.
